- Ø Two signal ports with full duplex design.
- Ø Aluminum-alloy casing with IP65 protection has high resistance to dust, water and corrosion.
- Ø Linear power amplification to effectively suppress inter-modulation and spurious emission.
- Ø Adopting filter with highly selectivity and low insertion loss eliminates interference between uplink and downlink.
- Ø Stable and improved signal transmission quality.
- Ø Built-in 5G Dynamic TDD Sync Detection Module, automatic completion of 5G wireless network cell search and wireless signaling processing.
- Ø Smart Automatic Level Control (ALC) ensures output level stable and adjustable continuously.
- Ø Auto Isolation check between service and donor antennas.

- Ø Smart mode to auto-adjust gain according to the isolation and signal level received by donor site.
- Ø USB port provides a link to a notebook for local supervision or IP Based NMS(Network Management System) that can remotely supervise repeater's working status and download operational parameters to the repeater Via Ethernet.
